

University of Exeter Business School Photographic Exhibition

What's special about where you come from?

To celebrate the international diversity of the University of Exeter Business School, students have been involved in a photography and film competition, representing different aspects of the places they come from. Drawing on themes such as people, cultural activities, places and landscapes, the exhibition seeks to develop interest and understanding of students' diverse backgrounds.

Over 150 photographs are showcased, taken by students from around the world, including China, Thailand, Malaysia, Zimbabwe, Germany, Italy and France, as well as the UK. Students in all levels of study - from 1st year undergraduate through to postgraduate students and PhD candidates - have participated, with stunning results.

With much difficulty due to the extremely high standard of all entries, judges chose three winning sets of photographs and further five were highly commended. Judging criteria ranged from how the photographs tell a story about the student's home locality, to how the photographs worked together as a set, to photographic or film technique and composition. Although prizes could only be awarded to a selection of photographs, every one highlights interesting aspects of the places that students come from.

Wednesday 10th to Monday 29th March 2010
Business School Lecture Theatre Corridor, Streatham Court.

University of Exeter, Rennes Drive, EX4 4PU.

Open Monday - Friday 8.30am - 6pm

The competition has been organised through the JISC-funded 'Integrative Technologies' project, a joint initiative between the University of Exeter Business School and Education Enhancement. It is a 'Students as Change Agents' activity, with students taking the lead in enabling others in their School to understand the richness of international diversity.

Exhibition coordinated by Dale Potter
 Student Projects Leader for the Integrate Project
